

HOUSTON • MEGA-EVENT HEAT

Where should Houston
spend **\$1M** to protect
68,000 fans from
heat?

THE PROBLEM

Same heat. Very different **risk**.

113°F

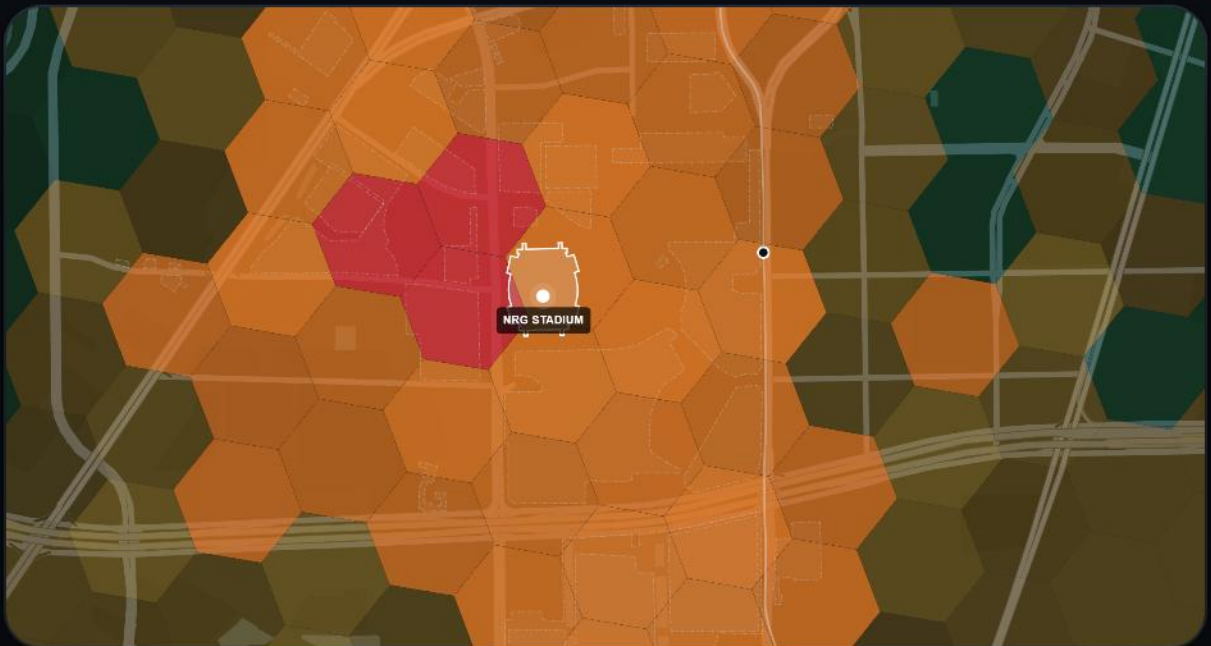

heat index at 98°F &
50% humidity

14°F

gap between
Houston
neighborhoods

68,777

seats at NRG
Stadium

Danger concentrates on parking lots, rail platforms and security lines.

THE IDEA

5 data silos → 1 decision map

Heat

Crowds

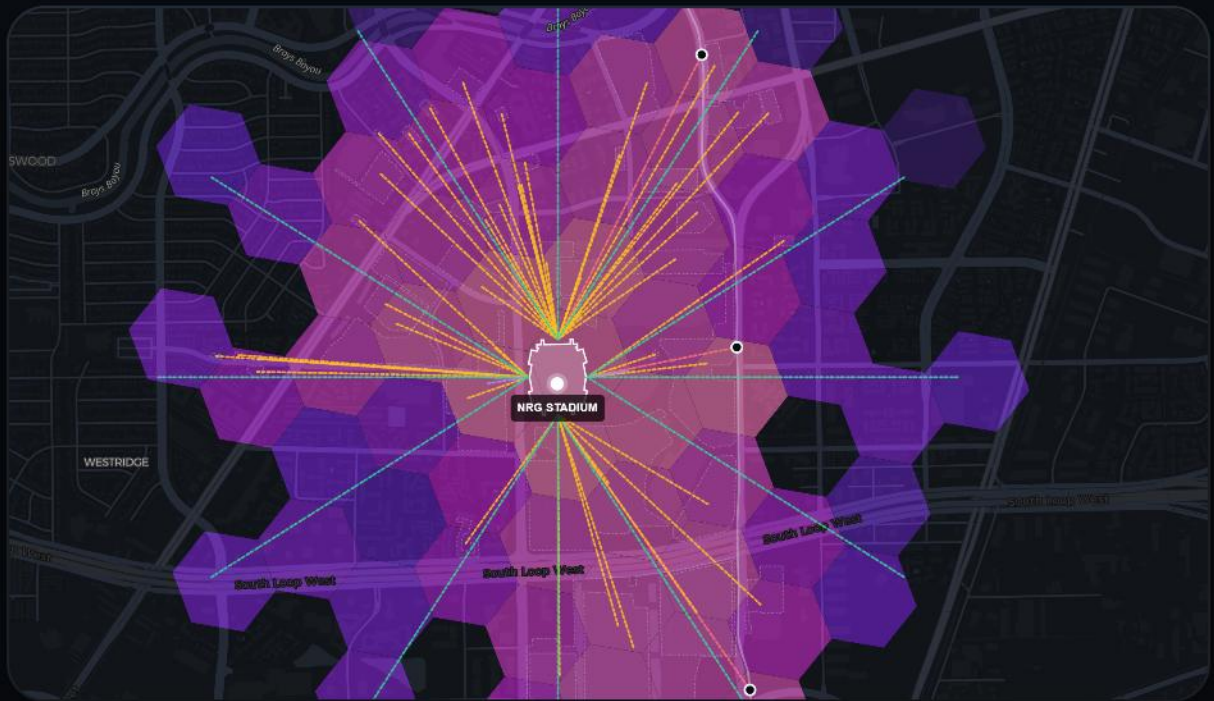

Health

Shade

Cooling

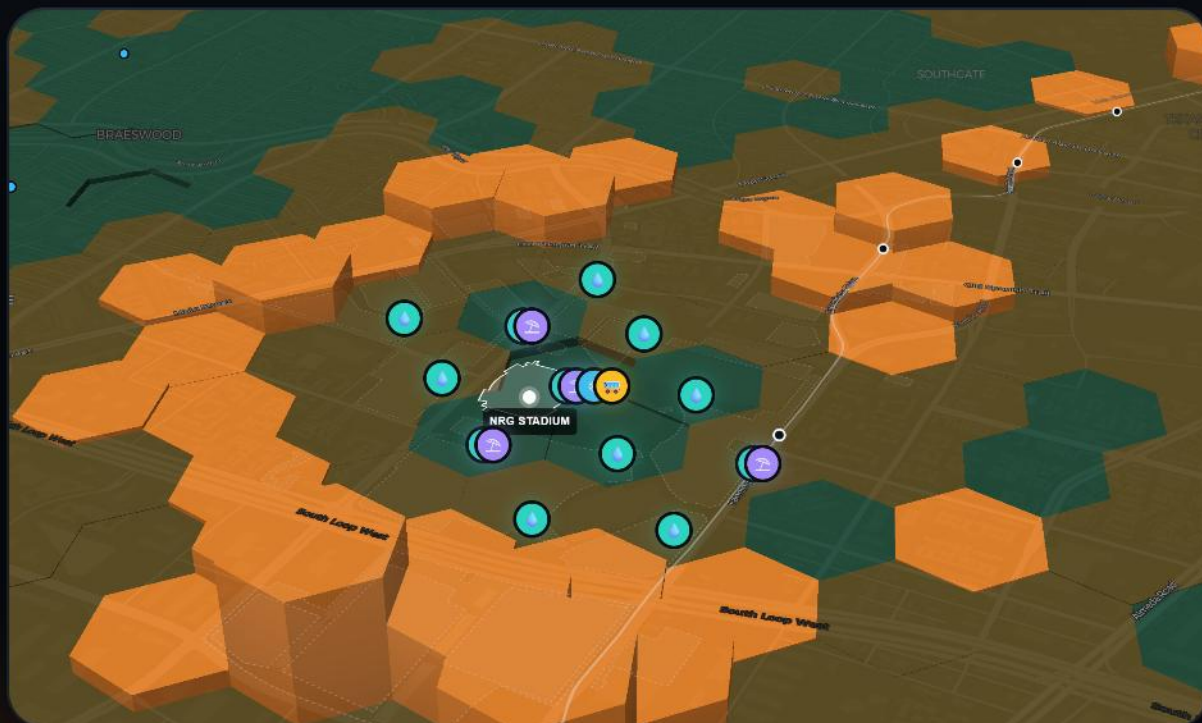

11 open datasets · 3,434 hex cells · crowds routed from real stations & lots

GIVE IT \$1M

Critical zones:

3 → 0

17,109 → 0

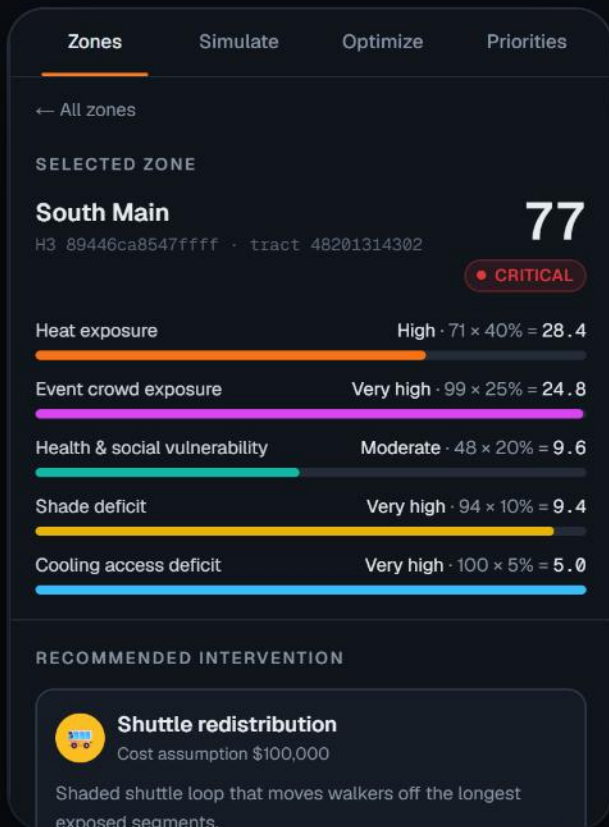

visitors routed through critical zones

-10.2%

exposure burden for \$990K

TRY IT

A map, a plan, and the evidence behind every dollar.

- ✓ Transparent risk index
- ✓ Place cooling, shade, water, shuttles
- ✓ Budget optimizer
- ✓ AI explanations from the facts only
